## Description

.Net developer with experience for minimum 1-3 years, with capabilities of executing CRUD operations and ability to develop software.

## Role and Responsibilities

- Utilize established development tools, guidelines and conventions including but not limited to Visual Studio, ASP.NET, SQL Server, HTML, CSS, JavaScript, and C# .
- Create and deliver data-driven reports.
- Design, code and test new service-oriented web software applications.
- Enhance existing systems by analysing business objectives, preparing an action plan and identifying areas for modification and improvement.
- Maintain existing software systems by identifying and correcting software defects.
- Investigate and develop skills in new technologies.
- Create technical specifications, test driven scripts and test plans.
- Create new and extend existing operational documentation.
- Consult closely with management and occasionally agency staff related to projects and tasks.
- Consult colleagues concerning new development, enhancement, maintenance and performance of software systems.
- Develop, implement and support new software.

## Skills Required

- Strong knowledge of ASP.NET web framework .
- Proficient in C# , with a good knowledge of their ecosystems .
- Knowledge of HTML-5, CSS, JavaScript, BootStrap.
- Strong understanding of object-oriented programming .
- Skill for writing reusable libraries .
- Familiarity with SQL Server .
